App Modernization Services

Discovery and Workload Assessment (Sizing and Pricing)

Design & Architecture
Blueprint

Transformation using Tools & Accelerators

Continuous Integration and Automation

- Mobile / Web / Devices / Cloud / Serverless / API / Microservices
- Jump start reference architecture framework from Centre of Excellence
- Accelerators and Tools for Code Generation Improved Quality at Reduced Cost
- Automated Infrastructure Provisioning, Continuous Integration and Deployment

Jump Start Framework – App Modernization

✓ These Frameworks has Proven 20% More Productivity with 30% Less Effort

Media streaming integration for videos using cloud technology stack

Native video / audio integration

Complex Image capture, editing, cropping and stitching functions

Multiple products & images loading with performance optimization

Facebook and Google Ads Integration for Revenue

Multi-lingual supporting 20 international languages

In-App product purchase and subscription

In-App payment integration - one time and recurring

Auth0 Integration / Universal / Single-Sign-On

QR and Barcode

generation

RFID Integration

Payment gateway

including wallets

integration

Social Login Integration -FB and G+

Google Maps Integration

Multiple 3rd party integration for Identity verification based on ID Proofs

AWS and Azure -Serverless APIs

Share option using WhatsApp, Email, SMS, Facebook and Twitter etc.

Custom Dashboard Controls

integration

True Caller integration

Firebase integration for notification and Crashlytics

110110

Complex encryption /

decryption functions

React Native Material and Native base UI designs

Customized mobile push notification with admin console & filters

Intelligent Chatbot Integration

Offline mobile application

capability

Geo Location based Services

Multi Factor Authentication

Jump Start Framework – Cloud Modernization

✓ These Frameworks has Proven 40% More Productivity with

40% Less Effort

Workload assessment for Cloud Migration

Cloud IT Landscape Design and Implementation

Virtual Machines provisioning for Dev/Test, QA, Staging and Production

Build a Pilot Infrastructure / POC

Data Migration to Cloud Storage

Backup solution on the cloud using Commvault, Veritas

VPN / Express Route solution for on-prem cloud connectivity

High Availability Solution Design and Setup

Disaster Recovery Solution Design and Setup

Setup Monitoring and Alerts against budget limits

Application Migration / Hybrid Migration strategy

Cloud Adoption Training (Mission Critical workload On Azure)

Automated Virtual Lab Provisioning for Corporate Training

ENGAGEMENT MODEL

Full Time Engagement (FTE)

- Client owns delivery
- Time and Material pricing model
- Offshore engagement

Dedicated Resource

- Client owns delivery
- Capped Time and Material pricing model
- Offshore engagement

Managed Product

- We Own Delivery
- Client Owns Product
- Fixed Monthly pricing model

Client Partner

- We Own Delivery / Product
- Client Monitors
- Consulting Led Engagement pricing model

Benefits

• Leverage knowledge and skills on demand

Benefits

- Controlled cost helps business to release capital for investment
- Our COE Support

Benefits

• Delivery owned by service provider.

Benefits

• Free up business to focus on its core business activities

Challenges

- Our COE Support is limited
- Adjacent skills of any project will need new resources
- Delivery to be owned by onsite client management

Challenges

• Delivery to be owned by onsite client management

Challenges

Doesn't work in a business with
 < 3 months duration

Challenges

- Ideation and journey map in the beginning
- Doesn't work in a business with < 6 months duration
